Small angle neutron scattering
Prompt gamma activation analysis
Neutron diffraction
Neutron reflectometry
Neutron imaging

13th Central European Training School on Neutron Techniques
gives insight into neutron research methods and their application in studying the structure and dynamics of condensed matter. Theoretical training and practical work together with a poster section gives good opportunity for the participants to connect their own research with neutrons. PhD students, students and newcomers in this field are welcomed.

Organisers
Zoltán Dudás
János Füzi

Contact
cets@bnc.hu

Venue
Budapest Neutron Centre
1121 Budapest
Konkoly-Thege M. út 29-33
Building 19.

Application deadline:
15th February, 2019
